

## Dusi needed to be autonomous ...We financed the solution!

Dusi Bus Service needed their own fare collection system to be autonomous.

...eBus installed, financed and continues to host the system

# eBus installed & implemented the entire system in one weekend

Situated in Pietermaritzburg, Kwa-Zulu Natal, privately owned Dusi Bus Service needed their own fare collection system.

## The Challenge

After upgrading to a newer Wayfarer system, another bus company sold their old Wayfarer ticket machines to Dusi Bus Services.

While Dusi benefitted from the “some 30 years old” Wayfarer system for many years more, the costs of maintaining their old system was ever increasing as it got older.

## The Solution

eBus Supplies offered Dusi Bus Service a rent to own scheme which fitted their budget, and increased their bottom-line.

Wayfarer TGX150

## The Result

Increased revenue, increased bottom-line, better service to the commuters, no more repairs, no more down-time.

## Quick turn-around time

eBus Supplies installed all the buses over the weekend, and turned-on the system on Monday morning.

The complete implementation which included, configuration of Routes, Duties, Fares, software installation, etc... all happened over one weekend.
