

Wayfarer's proven track record

...wins Africa's Best 350

Individual bus owners came together.....

.....in harmony to form one entity

...Wayfarer 6 was the obvious choice

The Eastern Cape Department of Transport encouraged individual bus operators to form a single legal entity across the province, which gave birth to Africa's Best 350 Limited.

AB350 has experienced sustainable & phenomenal growth to a fleet of 185 busses and growing.

AB350 employs 461 permanent staff with depots all around the Eastern Cape at Bizana, Butterworth, Lusikisiki, Matatiele, Mount Frere, Mthatha, Ngcobo and Queenstown.

The Solution

After pilot programs, trials of other ticketing systems, and much due diligence, AB350 bought the Wayfarer 6 as their system of choice.

Wayfarer 6

The Result

Senior Management firstly appreciated that while their buses frequently break due to the unpaved roads and extreme temperatures, their Wayfarer 6 system runs hassle free covered by a Service Contract.

With the head office in Mthatha, and depots spaced out around the province, the web-based Back Office Reporting System meant reports can be drawn from anywhere in the world.

The Wayfarer 6 sends transaction data, and downloads configuration information; automatically communicating to the Cloud Server via 3G.

Leave it to eBus

Increased revenue, increased bottom-line, reduced maintenance costs, better service to the commuters, better reporting to the Department of Transport are some of the reasons why AB350 awarded eBus Supplies the contract to supply & maintain their fare collection system.
